

Download Office and install Office for Windows

1. Sign in to Office 365, at <http://portal.office.com/OLS/MySoftware.aspx>.
2. On the **Office** page, select a **Language**, and then choose **Install** to install the 32-bit version.

Note To install the 64-bit version, choose 64-bit in the **Version** section before you choose **Install**. If you're uncertain, try [Choose the 32-bit or 64-bit version of Office](#) for more information.

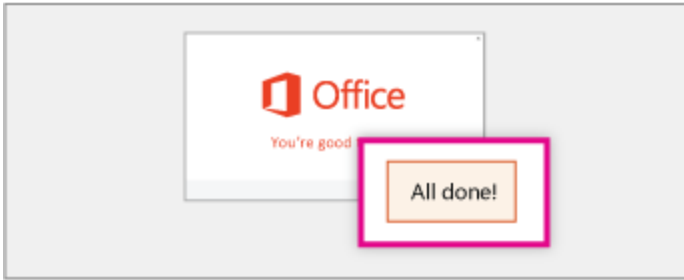

3. At the bottom of the screen, select **Run**.

4. Follow the prompts and accept the license agreement.

5. When you see "You're good to go," select **All done**.

Now you're ready to start using Office. In the Windows 8 start screen or on the Windows 7 start menu, type the name of the Office application you want to use, like Word, and open it. See [Can't find Office applications in Windows 8?](#) if you need help finding the apps after installing Office.
